

## **MAGNI 112**

*Magni 112 is a chrome-free water-reducible paint for brake rotors and drums. The coating is applied to a clean, dry part and is cured at 250°C. Coated parts can be handled immediately after coating.*

*Magni 112 is approved for use at Honda in the Americas and Europe. This durable coating provides high corrosion resistance and is a cost effective single coat system.*

*Magni 112 is black in color. Magni 112 is applied via spray application methods.*

### **Performance Data:**

Salt Spray  
ASTM B117                      48 Hours Minimum

Coating Thickness                      50 microns

### **Specifications:**

Honda HES D2021-Class 1
