

MAGNI 130

Magni 130 is a chrome-free water-reducible paint for brake rotors and drums. The coating is applied to a clean, dry part and is cured at 200°C. Coated parts can be handled immediately after coating.

Magni 130 is approved for use at several Japanese vehicle manufacturers in the Americas and Europe. This durable coating provides high corrosion resistance and is a cost effective single coat system.

Magni 130 is black in color. Magni 130 can be applied via spray application methods.

Performance Data:

Salt Spray ASTM B117	240 Hours Minimum
Coating Thickness	50 microns

Specifications:
