

## MAGNI 234

*Magni 234 is a black, chrome-free corrosion resistant coating for stainless and aluminized stainless steels typically used for fabricated mufflers, resonators and tail pipes. This coating is applied to clean, dry substrates and oven cured.*

*Magni 234 is spray applied to exhaust-related components requiring heat resistance to 450°C with additional cosmetic advantages when applied to visible components.*

### Performance Data:

Salt Spray 240 Hours  
ASTM B117

#### Corrosion Resistance

Improved when applied over aluminized stainless steel surfaces, up to 450° C

#### Corrosion Durability

Improved when applied to bare stainless and low-carbon steel

### Specifications:

Chrysler DBL7340  
Ford WSA-M2P170-A2  
General Motors 9984299, GMW15196
