

MAGNI 265

Magni 265 is a chrome-free duplex coating system that combines an inorganic zinc-rich basecoat with an aluminum-rich organic topcoat.

Magni 265 is designed for use on vehicle underbody stampings and other structural components. Magni 265 provides corrosion resistance comparable to hot-dip galvanizing, while substantially lowering the components' weight. It can be used as a stand-alone system or as a base layer for other protective topcoats.

Magni 265 can be applied via dip/drain or spray application methods and is grey/silver in appearance.

Performance Data:

Salt Spray
ASTM B117 1000 Hours

Cyclic Corrosion Resistance
GM9540P 120 cycles

Coating Thickness 15-30 microns

Specifications:

AM General 5934851 Pending
