

# MAGNI 336

*Magni 336, is a chrome-free highly conductive thermoset aluminum rich coating developed for fuel tanks in automobiles. It is coil-coated as a barrier topcoat on both sides of either zinc-nickel or galvaneal coated sheet steel.*

*Magni 336 is a patented formulation which provides many proven benefits. The fuel resistance accommodates all OEM fuel blends, including flex fuels. Magni 336 is available in silver and can be applied via coil-coat application methods.*

## Performance Data:

<b>Salt Spray</b> ASTM B117	2000 Hours
<b>Humidity/Adhesion</b> GM 4465P/GM 9071P FLTM BI 106-01	1000 Hours/8 or better  1 or better
<b>Corrosion Resistance</b> GM9511P/9511D GM9505P Cycle J SAEJ2334 SAEJ400 Gravelometer Ford P3-87A or P3-76A	20 cycles 10 year 160 cycles 30+ pints 100 cycles
<b>Cure Test</b> GM 4350M	10 double rubs

## Specifications:
