

MAGNI 569

The Magni 569 a hex chrome-free duplex fastener coating system that combines a plated zinc and non-hex chromate substrate with a durable Magni chrome-free organic topcoat. Magni 569 provides superior product performance in fewer layers than comparable finishes. Fewer processing steps results in improved quality and reduced costs.

Magni 569 is designed for use on fasteners, deck screws and other building hardware. Magni 569 is suitable for use in treated lumber.

Magni can color match to meet customer requirements. Magni 569 is most commonly used via the dip/spin method.

Performance Data:

Salt Spray 1000 Hours
ASTM B117

Kesternich
 DIN50018-1.0 30 cycles
 DIN50018-2.0 15 cycles

Coating Thickness 10-12 microns
Topcoat over 8 microns min. zinc/trivalent or non-hex chromate
