

THE MAGNI GROUP, INC.™

Why Choose MAGNI™ Coatings to Prevent Corrosion?

**HDG at 500 Hours
ASTM B117**

VS.

**Magni 565 at 1,000 Hours
ASTM B117**

Heavily relied upon for extreme corrosion environments, Magni engineered coatings are widely preferred in the automotive, military, and commercial building industry. Our duplex coating systems provide the advantages of a sacrificial, inorganic, zinc-rich layer with an aluminum rich topcoat. Friction modifiers are also integrated into the coating to provide consistency during assembly.

Magni is the environmentally friendly, cost effective option when superior corrosion protection is required.

- Provides Excellent Bi-Metallic Corrosion Protection
 - No Hydrogen Embrittlement Concerns
 - RoHS, WEEE and ELV Compliant
 - No Cr, Pb, Cd, Cu, or Ni
- Thin film making it ideal for wind turbine and tower fasteners
